

DRAIN CLEANER

TYPE - EASY CLEANER

The EASYCLEANER is built to clean surface water drains, sewer drains and other domestic drains. For cleaning Cow sheds , Machinery and Vehicles etc when you need high water volume for efficient cleaning. The EASYCLEANER is also effective in slatted floors with run off channels in chicken pig and cow sheds etc. It will clean drain pipes down to 30mm or larger discharge pipes on industrial sites.

EASY CLEANER

The easyclean comes standard 100 metres of ½” 90 bar working pressure hose with 142 ltr/min-50 bar piston diaphragm pump.

The pressure and high water volume at the nozzle pulls the hose up the drain pipes.

For retrieval there is a manual rewind handle to re load back onto the reel.

Included in the specification is stainless steel suction filter, suction filter pre pump and P.T.O. Shaft.

OPTIONS:

- For the EASY CLEANER to have more water, we can offer a Pumps 192ltr/min-50 bar piston diaphragm type.
With these pump you can use open water.
When you use a bigger pump, you can drive with less RPM or for using a longer hose of 5/8”.
- You can also supply a bigger reel on the EASY CLEANER for using 5/8” hose to get more water on the nozzle, for better cleaning results.
- With the DUO reel on the EASY CLEANER we have standard 100mtr ½”-90 bar hose and
- 100mtr 5/8”-80bar hose, for cleaning bigger and longer pipes
- The bigger reels can be driven by a hydraulic motor on request.
- We can mount a towing bracket on the EASY CLEANER, but it’s not allowed to use this on the road for pulling a water bowser.
